

DOES YOUR CHILD HAVE A VISION PROBLEM?

Dear Parents,

Did you know that **60%** of children who have trouble reading and writing may have poor eyesight and not know about it? Good eyesight plays a big role in how well your child will do at school.

But signs of poor eyesight are not always easily spotted. To make sure your child's vision is normal, please consider getting their eyes tested by a Doctor of Optometry. There is no charge for every child in Ontario who has an OHIP (Health Card) card up until age 19.

GET FREE GLASSES FROM THE EYE SEE... EYE LEARN® PROGRAM

If your child was born in 2009, he or she can get one **free** pair of glasses with their eye test, if prescribed, through participating Doctors of Optometry. (Offer available until June 30, 2014.)

BOOK AN APPOINTMENT WITH AN EYE SEE... EYE LEARN® DOCTOR OF OPTOMETRY TODAY
